

# BAUMHEIDEHONIG

A detailed photograph of a bee on a yellow flower. The bee is positioned on the left side of the frame, facing right. It has a dark, segmented body with a fuzzy texture and is carrying a small, orange, oval-shaped object (likely a pollen pellet) on its leg. The background is a soft, out-of-focus yellow, suggesting a field of flowers. In the bottom left corner, there is a small sprig of green leaves with several small, white, bell-shaped flowers hanging from it.
